Integeo announces support for Cognos 8.4

December 22, 2008

Company: [Integeo](#)
Industry: Geospatial Technology
Location: Sydney, CO, Australia

Integeo is pleased to announce that its spatial hub Map Intelligence has been upgraded to work with the recently released version of Cognos 8.4. The linkage is now fully functional and supports Map Intelligence links to all supported GIS servers including ESRI, Geoserver and MapInfo.

In addition support for Google Earth export of spatial analytics generated from Cognos 8.4 input data is included and also Google Maps overlays.

Map Intelligence provides a capability to link Cognos 8 software to dynamic maps based on a complete spatial application, creating a location analysis capability within your Cognos report environment.

Integeo provides for Cognos users a range of GIS tools that can now be linked to Cognos' server based software via Cognos System 8. Map Intelligence provides a powerful template based facility that links to Cognos Report Studio, this extends the power of Cognos report developers to include full dynamic maps driven from and by data in your Cognos reports.

The map updates as filter prompts are applied in the report and zoom features within the map can be used to move to

If your business is infrastructure, be in Tampa from April 19-22, 2009. Your colleagues and suppliers will be gathering in one place to learn better ways to plan, design, manage, and maintain geospatial systems and operations. [Click Here](#)

Join 8,000 geographers, GIS specialists, and environmental scientists for the latest in research, policy, and applications in geography, sustainability, and GIScience during the AAG Annual Meeting in Las Vegas to be held March 22-27, 2009. Visit www.aag.org for additional information.

lower levels. The report is embedded and delivered within the Cognos report framework.

If you have the Cognos Report platform deployed and are looking to provide an ad hoc Location Intelligence capability for your business analysts then we can provide the software platform to achieve this.

Map Intelligence interoperates with mapping software from ESRI, MapInfo or GeoServer and our Google Earth export feature enables Cognos reports to be viewed in Google Earth offering powerful 3D visualisations.

You can see several demonstrations showing Map Intelligence working with Cognos BI at Online Demonstrations.

Integeo can provide a complete bundled solution; Integeo is a one-stop shop for your spatial analysis needs. We can also provide Map Intelligence as a 'Software as a Service' (SaaS) with a remotely hosted Map Intelligence spatial hub to be automatically linked to your Cognos reports environment.

POLL

What's the most likely to happen in 2009 with regard to your use of GIS software? I will:

- learn and use a new (to me) analytic tool
- learn and use a new (to me) cartographic tool
- learn and use a new (to me) short cut
- use the software as I always have

The answers are in the details.
