

Australian Business Atlas

Version 2.0

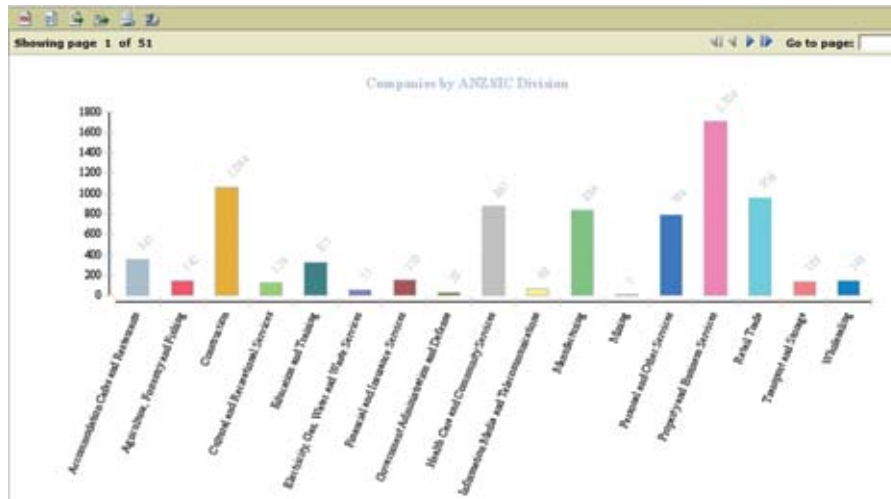

Free 30-day evaluation trial

Latest release V2.0 updates, features and benefits:

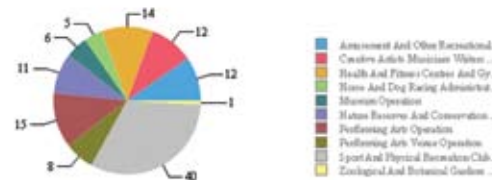

- Proven connectivity and compliant with the Australian Business Register, Australia's most up to date and comprehensive Government-based business data source.
- Capture all businesses (including home-based) that have an ABN and are registered for GST.
- Data aligns with Australian Bureau of Statistics business demography.
- Import and update your own data via simple online templates.
- Use Atlas to create high level and detailed industry reports suitable for both internal and external presentation.
- Create and export segmented industry and/or location specific business contact lists.
- View satellite and street level imagery of specific locations.
- Export detailed data for further analysis.
- Improved report export and formatting to most commonly used packages i.e. PDF, word, PowerPoint.
- Improved mapping.
- Web-based delivery simplifies IT and GIS implementation.
- Flexible implementation packages to suit most budgets.

Leading the way in spatial business intelligence for government and industry

Improved Mapping

View using satellite and street imagery

The Australian Business Atlas is features and functionally rich.

The Australian Business Atlas has been developed in a business intelligence/ mapping matrix that allows users extreme flexibility in how it can be used and to answer specific questions.

These include:

- Preparation of strategic employment plans.
- Identification of industry clusters.
- Development of industry attraction strategies.
- Development of strategic economic plans.
- Identification of industrial environmental risks.
- Capital expenditure prioritization.
- Support for business planning decisions.
- Public inquiries about the number and location of specific business types.
- Additional mapping overlays i.e. drainage, power distribution, transport and freight routes.
